

ACROBATIC GYMNASTICS

BONUS ELEMENT FORM 2026-2027

This form should be used to identify and value bonus elements to be performed in an exercise for International Track competitors. Bonus elements and additional values should NOT be included on tariff sheets generated from Acro Companion. Instead, use this form to indicate bonus elements. This form must be submitted as a separate form along with (at the same time and to the same system) tariff sheets for each competition. One form per exercises where bonus elements are to be performed. Judges will evaluate tariff sheets and the bonus element form and include bonus values in the total score for the exercise. If this form is not submitted, no bonus value will be awarded.

Please complete the form below in its entirety, including a computer-generated illustration of the bonus element. Refer to the Acrobatic Gymnastics 2026-2027 Elite Bonus System document and relevant errata for complete rules regarding bonus elements. For bonus element(s) successfully performed in competition, the DJ will award appropriate bonus credit to the exercise final score as outlined in the Bonus system overview.
