Meeting called to order at 1:30 CST

Marcia Motioned that the following recommendation be put forward to the PC:

The Growth and Development Committee recommends that Level 6 include a compulsory routine, consistent in format with those used for Levels 2–5. We also recommend that this routine utilize the same floor space configuration as Levels 2–5.

This proposal is intended to support developing gyms, developing states, rebuilding regions, and new or emerging PAGU countries as they grow their acrobatic gymnastics programs. Aligning Level 6 with the existing lower-level structure helps reduce barriers to entry and creates a more seamless progression for athletes and coaches, especially keeping in mind the "non-acro" coaches.

Importantly, this recommendation is made with the entire program in mind—not just what benefits individual regions. We believe that by considering the needs of the sport as a whole, we can better foster sustainable growth and long-term success for all.

This proposal reflects our shared commitment to expanding access, consistency, and opportunity across all levels of our acrobatic gymnastics community here in the US and internationally.
